SCIENCE OR FAITH?

Season 1

A deadly epidemic outbreak affects the southern part of the country. The health authorities send a group of three young doctors to vaccinate people from all over the region and teach them preventive health measures. During their journey they pass through a town called Aguazul, where the population mysteriously resists their visit. Even the doctor in charge of this town warns them not to try to vaccinate its inhabitants, but the young people do not listen and embark on the path to what will be the last town of their route.

Their arrival marks the beginning of a series of unusual events, and as they enter this strange world "in the name of science", they witness phenomena out of reality, all related to a famous "Child", who confronts his rigid scientific arguments against the possibilities of faith.

Season 2

In the second season, the pilgrims continue to come to Aguazul in search of healing, but the "Child" grows weaker every day. The arrival of a journalist threatens to open the cult to the world, so strange and violent events begin to occur in the town and the camp. Now, the life of the "Child" is hanging by a thread.
