Synopsis

A comedy drama which portrays the complexities of human relationships from a group doing psychological therapy sessions.. Patients revolves around the traumas of five participants – and their no less neurotic therapist – who seek to resolve their anxieties, accept their manias and heal their relationships.

Marco, the protagonist, begins a new life with his father, who makes him reflect on how he relates to the people he loves, and questions his ability to bring order to the lives of his patients. In an intimate tone and with touches of humor, the lives of Marco and his patients float during therapies, projecting conflicts, problems and dissatisfactions of our current society.

In each episode, the characters are sharing their emotional stories, revelations and twists, and in this sense, the series proposes a realistic resolution of conflicts leading to growth and healthy human relationships.
