Synopsis

After the fall of meteorite fragments and extraterrestrial material that impact the earth, bizarre events occur in the different spaces and times of the collisions. These events cause ancient Aztec prophecies to be fulfilled.

Anthology composed of nine segments presenting characters who face mythical, fantastic and terrifying situations, revealing dimensions and textures, rarely explored in Latin American cinema.

AZTECH is an ambitious film proposal directed and produced by some of the bests director in Mexico specialized in fantasy and Sci Fi.

- The AZTECH anthology is comprised of segments that explore dimensions and fantastic textures rarely addressed in Latin American Cinema.
- AZTECH comes to life during a crisis of the genre in Mexico. This production of this independent film is a success to the genre and it offers a new potential for the SciFi genre in Mexico.
- AZTECH was filmed in Mexico including the city and several States like Yucatán, Morelos, Veracruz and Estado de México. It also has locations in NY and Vancouver.
